

# Self-Leveling Underlayment Industry

Equipment to Efficiently Level Flooring

PROVEN QUALITY. LEADING TECHNOLOGY.

## ► Getting the Job Done Faster

---

Hand mixing and dumping self-leveling underlayment in large areas can be a logistics nightmare and limits your crew to covering one room at a time. In addition, it's backbreaking work carrying buckets up tall buildings and can put a strain on your team's health.

### **Easily Maintain a Wet Edge**

With new flooring materials evolving to dry faster and other trades demanding to get access to rooms sooner, it's time to switch to equipment that will help you get the job done quickly and efficiently. Let Graco's pumps do the hard work and deliver self-leveling underlayment (SLU) from the mixing station to the floor.

## ► Your Mixers Plus Graco's Pump

### Pump Like a Pro

Graco's pumps are revolutionizing a market dominated by mixing, wheeling, and dumping. Simply set up a ToughTek pump near the pallets of material and have two to three mixers dumping into the pump's hopper, keeping it full at all times. The hose will then deliver self-leveling material up to 300 feet horizontally and 50 feet vertically so you can complete multiple floors efficiently.

#### ToughTek® SL340e

Designed with Graco's patent-pending piston pump technology and an efficient direct drive motor, the ToughTek SL340e moves self-leveling underlayment quickly from a mixing station to your jobsite floor. Pump up to 130 bags an hour from a pump that plugs into any standard 120V, 15A outlet.

PISTON PUMP

## ► One Machine to Handle Mixing and Pumping

Large jobs are no longer daunting, and the days of hauling pallets of bags all over a job site are over. Graco's ToughTek MP20 and MP40 mixing pumps are compact and easy to operate. Water is automatically added to the mixing section so all your crew needs to do is set the water flow rate, add material to the hopper and they're ready to begin. The result is consistent material and flow from a machine that is ready to work all day long.

### ToughTek® MP20

With its ability to mix and pump, this all-in-one compact machine is the ideal solution for contractors looking to make the switch from manually applying self-leveling underlayment. The MP20 can deliver up to 100 bags per hour allowing contractors to get jobs done faster.

ROTOR STATOR PUMP

### ToughTek MP40

Although identical in size and function as the MP20, the MP40 has double the output and can pump up to 200 bags per hour of self-leveling underlayment. The larger motor and pump make the MP40 an excellent fit for contractors looking for a high production solution.

ROTOR STATOR PUMP

# ► ToughTek SL340e Piston Pump

This easy-to-use machine can be fed with two to three barrel mixers and stationed outside near the pallets of material, saving your crew the back and forth time that comes with mixing and dumping. Plug into any standard 120V, 15A outlet and get the job done quickly.

## **Compact and Portable**

- Weighs only 210 lbs
- Easy to move around the jobsite

## **Low Power Requirements**

- Plugs into standard 120V wall outlet
- No electrician or rewiring needed

## **Variable Speed Output**

- Dial in the exact speed needed, from low to high output

## **Floor Mounted 30 gal Hopper**

- Easily mix and pour with standard barrel mixers

## **Tool-less Hopper Removal**

- Disconnect in seconds for easy cleaning

## **Brushless Electric Motor**

- Direct drive
- No maintenance
- Longer life

## **Quick-knockdown Pump Lower**

- Fast and easy maintenance

# ► ToughTek MP40 Mixing Pump

Mix, pump and apply pre-blended cementitious and gypsum-based construction materials with a single, easy-to-use machine. Because one or two workers can operate the ToughTek Mixing Pump, it saves on labor expenses too. Its water system helps reduce material waste by maintaining material consistency at a uniform flow rate. Ideal for self-leveling underlayments, pre-blended non-shrink grouts and pre-blended topping materials.

### Compact Design

- Easy to maneuver

### Adjustable Stator

- Extends the life of the stator sleeve
- Adjust output pressure, as desired

### Flow Meter & Water System

- Steady water input results in consistent material mixing

### Rugged Hopper with Bag Breaker

- Holds six 50 lb (23 kg) bags

### Control Panels

- Easy to operate
- Adjustable material output

### Built-in Cleanout Sprayer

- Rinse and flush using incoming water

# Graco Has You Covered

Facilities Worldwide for Global Support

### Quality First

At Graco we pride ourselves on providing best-in-class products. Engineered solutions are manufactured in our own facilities, with the highest standards in the industry. We provide you with world-class customer support and expertise to help solve your application challenges.

### Global Reach

Graco has facilities across the globe to provide you with the products and service you need, where you live. Plus, Graco has dedicated field experts in all areas of the world to support the products we sell.

### Product Capabilities

Graco has a broad range of products that are engineered and tested to perform in the harshest environments so you can be certain your equipment is protected and working at peak performance.
