

# Stellair™

## MANUAL AIR SPRAY GUNS

Because when painters produce stellar results, everyone wins

### All-Star Ergonomics, Serviceability, and Spray Performance

Stellair pressure feed guns provide industrial painters with the ergonomics, serviceability, and performance, they need to enjoy and excel at their jobs.

#### Stellair

- Top quality atomization with air caps and models made for your application
- Durable construction and components for long life
- Reduced material waste with streamlined fluid path

#### Stellair ACE

- Up to **50 percent lighter** than other industrial air spray guns
- Unique **carbon fiber construction**
- Hand tightened hose connections
- Fluid cartridge removal tool built into the trigger
- LVMP/HVLP air cap for top atomization and cleanliness

# Stellair™

## MANUAL AIR SPRAY GUNS

### Industry Leading Spray Performance

Stellair air caps are designed to produce the best atomization and spray pattern for your applications.

**General industry** air cap produces a uniform spray pattern with low atomizing pressure that reduces air cap build-up.

**Automotive** air cap atomizes for Class A finishes when spraying base coats, clear coats and primers.

**Wide pattern** air cap sprays consistently over large surfaces.

**Trim** air cap produces a well-defined edge with minimal overspray, essential for edges, trim, and dielectric applications.

**Adhesive** air cap atomizes waterborne and solvent borne adhesives and sealants.

**High solids** air cap maintains high throughput while spraying ultra violet (UV) coatings and other abrasives with low volatile organic compounds (VOCs).

**Wood** air cap handles low viscosity materials used in wood finishing applications.

### Stellair ACE Technology

Same air cap delivers top atomization and cleanliness to both technologies.

- **LVMP** (low volume medium pressure) air spray reduces bounce back and overspray, while delivering high finish quality and transfer efficiency.
- **HVLP** (high volume low pressure) produces a controlled, low velocity spray pattern that reduces bounce back and overspray, while meeting environmental regulations

### Triton® Air Spray Packages

Triton air operated diaphragm pumps with Stellair™ air spray guns bring affordable, fine finish spraying to wood and metal applications. The durable package needs little maintenance, while delivering a consistent spray pattern and uniform film thickness.

### Flexible and Lightweight Fluid and Air Hoses

Painters benefit from the ease of movement and low muscle stress of flexible and lightweight fluid and air hoses.

Both fluid and air hoses are available in lengths of up to 50 feet (15 meters). Six-foot (1.8 meters) whip hoses connect easily to longer lengths.
